Experience

06/2022 to Present

Web Developer - ADPL LLP, Kyrenia

- Developed and maintained responsive web applications using HTML, CSS, and TypeScript. Develop project concepts and maintain optimal workflow.
- Utilized Angular framework to build dynamic and interactive user interfaces, implementing features such as data binding, routing, and form validation.
- Collaborated with designers to ensure pixel-perfect implementation of UI/UX designs.
- Actively participated in Agile development processes, including sprint planning, daily stand-ups, and retrospectives.

Education

2019-2023

**Bachelor of Science: Software Engineering -
Eastern Mediterranean University, Cyprus**

Certifications

Create With Code!, Google Oct 2016

Create With Code V.2, Girne American University Nov 2017

PROJECTS

I As You Go

- Online bookkeeping services offered through online accounting software.

- Different packages available based on company requirements and desired level of assistance.
- Monthly or yearly subscription options.
- Integrated dashboard providing comprehensive company information.
- Integration with Xero and Companies House.
- In Xero, access to receivables, payables, owed and outstanding invoices.
- Ability to add/edit invoices and generate reports.
- Companies House integration for searching companies or officers and viewing related information.
- Full integration with Zoho, enabling management of invoices, reports, statistics, customers, accounts, and contact records.
- API built with Node Express facilitates the connection between the Angular app and Zoho.

Website For Employees

- Each employee in ADPL has a specific route associated with their name
- Visitors can fill in contact form and their data will be saved to Zoho CRM

VR Meeting Information
- Online meeting website for business owners.
- In this website you can get information about virtual meetings.You can learn inovative part about virtual meetings

Job Search WebSite

- Job Finder Website is my graduation project for university.
- free-to-use website for anyone who wants to find a job or give a job advertisement and provide the service layer to provide communication between them

Personal Webpage

- An introduction about myself.
- Detailed information on my educational and work background.
- A projects section showcasing my latest projects.
- Contact page and links to my social media profiles.

Turkish Cypriot Cultural Festival

- The website serves as the official online platform for the Turkish Cypriot Cultural Festival, providing information about the event, its history, and its activities.

Link Saver Extension

- This Chrome extension allows users to save links and tabs for later reference, helping to avoid clutter and organize browsing sessions efficiently.
- Users can save useful web pages by clicking a dedicated button provided by the extension. This action saves the link to a designated storage area within the extension.
- The extension also offers the option to save entire tabs. Users can click a button to save the currently active tab, preserving its state for future retrieval.
- The extension provides a user-friendly interface where users can view and manage their saved links and tabs. This helps in quickly acessing important resources without the need to keep multiple tabs open.
- To declutter the saved items, the extension includes a "delete all" button. Users can double-click this button to delete all the saved tabs and links, providing a clean slate for future browsing sessions.
